

# 100

100 ml or less size containers of liquids, aerosols or gels.

Container size is a security measure.

# 1

1 litre, clear plastic, zip-top bag holding 100 ml or less containers.

Bag limits total volume per person.

# 1

1 bag per traveller placed in the security bin

Isolating liquids speeds screening.

## The Planet Traveller Tips to Speed Screening

### Before you go...

- Pack liquids/aerosols/gels in your checked baggage. For a short trip you are permitted to carry-on 1-litre size, clear plastic, zip-top bag holding 100 ml or less containers of liquids, aerosols or gels. Limited to one bag per traveller.
- Exceptions include: baby formula/breast milk/baby food while traveling with a small child, medications, liquids (to include water, juice or liquid nutrients) or gels for diabetics or other medical needs. All exceptions must be declared to the Security Officer for screening.
- All footwear must be removed for X-ray screening. Wearing footwear that can be easily removed helps.
- Pack valuables such as jewelry, cash and electronics, as well as fragile items, in your carry-on. This will speed the screening process.
- Avoid wearing accessories that contain metal, which will set off the metal detector.

- Put all undeveloped film in your carry-on bag, because checked baggage screening equipment may damage film.
- If carrying a firearm, please check with your airline for appropriate procedures. Leave lighters at home.

### When you arrive...

- Take your 1-litre plastic zip-top bag out of your carry-on and place separately in bin.
- Declare all permitted liquid exceptions to the Security Officer in front of the checkpoint.
- Take your laptop and video cameras with cassettes out of their cases for screening.
- Remove your outer coat, suit coat, jacket or blazer to place in bin for X-ray.
- Place the following items in your carry-on before entering the screening checkpoint: cell phones and personal data assistants, keys, loose change, jewelry and large metal items.
